What is this product?

Type

This is an investment fund established as a Company With Variable Capital (SICAV).

Objectives

Investment objective The Sub-Fund seeks capital growth by investing its portfolio mainly but not exclusively in a diversified portfolio of global equity securities publicly traded on regulated markets.

Investment policies The Sub-Fund is investing directly or indirectly in global equity securities (including REITs) and investments are made across sectors and market capitalizations without any restriction as to the issuer's domicile. This also includes investments in the emerging markets.

The Sub-Fund may hold ancillary liquid assets or cash equivalent transferable debt securities and money market instruments with a residual maturity of less than 12 months.

For hedging purposes the Sub-Fund may use financial derivatives instruments.

The investments within the Sub-Fund are subject to market fluctuations and to the risks inherent in all investments; accordingly, no assurance can be given that their investment objective will be achieved.

The Sub-Fund promotes, among other characteristics, environmental and social characteristics according to article 8 of the SFDR, but does not have as its objective a sustainable investment. Nonetheless, it remains exposed to Sustainability Risks. Such Sustainability Risks are integrated into investment decision making and risk monitoring to the extent that they represent potential or actual material risks and/or opportunities to maximizing the long-term risk-adjusted returns.

The Sub-Fund considers PAIs by integrating relevant ESG factors alongside traditional financial factors as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with those issuers.

This Sub-Fund is highly diversified. Therefore, it is expected that the Sub-Fund will be exposed to a broad range of Sustainability Risks, which will differ from company to company. Some markets and sectors will have greater exposure to Sustainability Risks than others. However, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the SubFund.
