What is this product?

Type

This is an investment fund established as a Company With Variable Capital (SICAV).

Objectives

Investment objective The objective of this Sub-Fund is to achieve capital appreciation through investing mainly in the equity listed in Spanish markets and assets from Spanish issuers listed in other markets.

Investment policies The Sub-Fund invests more than 75% of its total exposure in equity assets and 90% of the equity will be invested in equity in Spanish markets and assets from Spanish issuers listed in other markets across all capitalizations and sectors.

The possibility to invest in small-cap assets can negatively influence the Sub-Fund's liquidity. The remainder will be invested in fixed-income assets, specifically public or private fixed income, including deposits and money market instruments, listed or otherwise, with a maximum of 25% of the total Sub-Fund exposure. The average term of the fixed-income portfolio is not predetermined. Issues will be required to have a minimum average credit rating (minimum BBB-). However, up to 100% may always be invested in assets with a rating equal to or greater than that of the Kingdom of Spain at all times. The exposure to currency risk will not exceed 30%. The Sub-Fund will not invest more than 10% of its net assets in shares or units of financial collective investment undertakings (UCI) which are qualifying assets, harmonised or otherwise, belonging or otherwise to the investment manager's group, with an investment policy consistent with that of the Sub-Fund.

The Sub-Fund may operate with derivative financial instruments traded in organised derivative markets for hedging and investment purposes and with OTC derivatives for hedging purposes. This operation entails risks due to the possibility that the hedging is not perfect and due to the leverage involved. The maximum degree of market risk exposure through derivative financial instruments is equal to the amount of the net assets.

The Sub-Fund may also invest in securities of real estate companies, including closed-end real estate investment funds like REITs (real estate investment trusts) which must be regulated by the local supervisory authority and be traded on the relevant local stock exchange.

The Sub-Fund promotes, among other characteristics, environmental and social characteristics according to article 8 of the SFDR, but does not have as its objective a sustainable investment. Nonetheless, it remains exposed to Sustainability Risks. Such Sustainability Risks are integrated into investment decision making and risk monitoring to the extent that they represent potential or actual material risks and/or opportunities to maximizing the long-term risk-adjusted returns.

The Sub-Fund considers PAIs by integrating relevant ESG factors alongside traditional financial factors as part of its due diligence, research and ongoing monitoring of individual issuers and via engagement with those issuers.

This Sub-Fund is highly diversified. Therefore, it is expected that the Sub-Fund will be exposed to a broad range of Sustainability Risks, which will differ from company to company. Some markets and sectors will have greater exposure to Sustainability Risks than others. However,

it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Sub-Fund.

For additional information, please refer to the Responsible Investment Policy of the Investment Manager available on its website: <https://www.edm.es/es/documents/edm-politica-inversion-socialmente-responsable-2022.pdf>.

Benchmark The Sub-Fund is actively managed without replicating any benchmark. However, the Sub-Fund is managed with reference to the IBEX35 NET RETURN index to merely informative and comparative effects. **BME Market Data** does not, under any circumstances, sponsor, promote, or recommend investment in the product, nor does the granting of this authorization imply a favorable judgment regarding the information provided or the suitability or appeal of the product.

Redemption and Dealing Investors may buy, switch and redeem shares of the Sub-Fund on a daily basis, which is a bank business day in Luxembourg.

Distribution Policy All income received by the Share Class will be reinvested.

Launch date The Sub-Fund was launched on 01/04/2014. The Share Class was launched on 27/04/2017.

Sub-fund Currency The reference currency of the Sub-Fund is EUR and the currency of the share class is USD

Switching between Funds Any Shareholder may request the conversion of all or part of his Shares of any Sub-Fund and/or Class (the "Initial EDM Sub-Fund") into Shares of any other existing Sub-Fund and/or Class (the "New EDM Sub-Fund") on any Valuation Day that is common to the Initial and the New EDM Sub-Fund (the "Common Valuation Day"). Restrictions about conversion between Sub-Funds may be found in the relevant Appendices of the respective Sub-Funds. Further, retail Shares may not be converted into institutional Shares and vice versa. Full details of the switching process are given in the prospectus of the Fund.

Intended retail investor

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 July 2015 and 31 July 2020.

Moderate: this type of scenario occurred for an investment between 29 February 2016 and 26 February 2021.

Favourable: this type of scenario occurred for an investment between 29 May 2020 and 30 May 2025.

What happens if Waystone Management Company (Lux) S.A. is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

	If you exit after 1 year	If you exit after 5 years
Total Costs	463 USD	1,484 USD
Annual cost impact*	4.6%	3.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.8% before costs and -3.8% after costs.

(*) The calculations include the maximum entry cost fee that may not apply to all investors.
